Dear Customer

We are happy to introduce to you our new catalogue, within which you will be able to see the complete range of products that we offer.

You will be able to find our well-known products along with new additions that we have recently added to our range.

We look forward to working with you in the future. Please contact us, should you need any further information on any of the items that we are offering.

Your Sincerely,
ECVA Ltd

The Company

ECVA Ltd offers a range of Side-Curtain and Load Restraint parts which is one of the most diverse in Europe.

Our position in the market is well established and helped due to the experience of our staff, each member of which has been involved in the commercial vehicle market for a minimum of 20 years.

We are located in Peterborough, UK where we run a modern production facility with both warehousing and offices.

Production, Quality and Testing

At ECVA we are first and foremost a manufacturer and we believe in providing our customers with products that surpass industry standards.

Our UK production department has two distinct areas of operation. The sewing department has some of the most advanced industrial pattern sewing machines available which produce thousands of straps every month, and our UK roller assembly lines manufacture a wide variety of side-curtain rollers to supply our customers around the world.

Not only are we producing our own products, but we are proud to now have the facilities to test them in-house, ensuring they meet or exceed both British and European safety and quality standards.

Compact Buckle
20mm—EU Norm 1230/2012

Minimum breaking
Force: 800kg

Part No: 113437
Webbing Width: 43-45mm
Buckle Length: 152mm
Buckle Width: 58mm
Material: Stainless Steel

Compact Buckle HD

Minimum breaking
Force: 1000kg

Part No: 113346
Webbing Width: 43-45mm
Buckle Length: 152mm
Buckle Width: 58mm
Material: Stainless Steel

Long Handle Buckle

Minimum breaking
Force: 800kg

Part No: 113333
Webbing Width: 43-45mm
Buckle Length: 174mm
Buckle Width: 58mm

Flat Hook—Wide Opening
with 2 ribs (M52)

Minimum breaking
Force: 1100kg

Part No: 113003

Webbing Width: 45—50mm
Hook Height: 52mm
Hook Width: 62mm
Material: Zinc Plated Steel

Part No: 113143

Webbing Width: 45—50mm
Hook Height: 52mm
Hook Width: 62mm
Material: Stainless Steel

Side Curtain Buckle Assemblies - Webbing Options

ECVA Side-Curtain buckle assemblies are manufactured using three types of webbing to suit the correct application and/or customer preference.

Polypropylene (PP) - High tenacity polypropylene webbing comes in 45mm or 48mm widths and is only available in black. It has a minimum break force of 1400kg and is suitable for most side-curtain buckle assemblies.

Polyester (PES) - Polyester webbings typically obtain lower elongation properties than PP webbing. They also come in 45mm and 48mm and are available in a range of colours. We offer two main break force strengths 2300kg and 3000kg.

Polyester 2300kg
Webbing—PES
Width: 43/45mm

Part No: 113449
Colour Black

Part No: 113448
Colour Blue

Part No: 113450
Colour Grey

Part No: 113453
Colour Orange

Part No: 114019

Instructions for use and maintenance of web lashing according to the European Standard EN 12195-2:2001

1) In selecting and using web lashings, consideration shall be given to the required lashing capacity, taking into account the mode of use and the nature of the load to be secured. The size, shape and weight of the load, together with the intended method of use, transport environment and the nature of the load will affect the correct selection. For stability reasons free-standing units of load have to be secured with a minimum of one pair of web lashings for frictional lashing and two pairs of web lashing for diagonal lashing.

2) The selected web lashings shall both be strong enough and of the correct length for the mode of use.

Basic lashing rules:

- Plan the fitting and removal operations of lashing before starting a journey.
- Keep in mind that during journeys parts of the load may have to be unloaded.
- Calculate the number of web lashings according to common laws and rules.
- Only those web lashings designed for frictional lashing with STF on the label are to be used for frictional lashing.
- Check the tension force periodically, especially shortly after starting the journey.
- Ratchet handle shall be in closed position during transport.

3) Because of different behaviour and elongation under load conditions, different lashing equipment (e.g. chain lashing and web lashings) shall not be used to lash the same load. Consideration shall also be given to ancillary fittings (components) and lashing devices in the load restraint assembly are compatible with the web lashing.

4) During use flat hooks shall engage over the complete width of the bearing surface of the hook.

5) Release of the web lashing:

Care should be taken to ensure that the stability of the load is independent of the lashing equipment and that the release of the web lashing shall not cause the load to fall off the vehicle, thus endangering the personnel. If necessary attach lifting equipment for further transport to the load before releasing the tensioning device in order to prevent accidental falling and/or tilting of the load. This applies as well when using tensioning devices which allow controlled removal.

6) Before attempting to unload a unit of load its web lashings shall be released so that it can be lifted freely from the load platform.

7) During loading and unloading attention has to be paid to proximity of any low overhead power lines.

8) The materials from which web lashings are manufactured have a selective resistance to chemical attack.

Seek the advice of the manufacturer or supplier if exposure to chemicals is anticipated. It should be noted that the effects of chemicals may increase with rising temperature and concentration. Polyester is resistant to most mineral acids but is attacked by alkalis.

9) Web lashings complying with this part of EN 12195-2 are suitable for use in the following temperature:

- -40°C to +80 °C for polypropylene (PP);
- -40°C to +100 °C for polyamide (PA);
- -40°C to +120 °C for polyester (PES).

These ranges may vary in a chemical environment. In that case the advice of the manufacturer or supplier shall be sought. Changing the environmental temperature during transport may affect the forces in the web lashing. Check the tension force after entering warm areas.

10) Web lashings shall be rejected or returned to the manufacturer for repair if they show any signs of damage. The following criteria are considered to be signs of damage:

- Only web lashings bearing identification labels shall be repaired.
- If there is any accidental contact with chemical products, a web lashing shall be removed from service and the manufacturer or supplier shall be consulted.
- For web lashings (to be rejected): tears, cuts, nicks and breaks in load bearing fibres and retaining stitches, deformations resulting from exposure to heat .
- For end fittings and tensioning devices, deformations, splits, pronounced signs of wear, signs of corrosion.

....continued

- 11) Care should be taken that the web lashing is not damaged by the sharp edges of the load on which it is used. A visual inspection before and after each use is recommended.
- 12) Only legibly marked and labelled web lashings shall be used.
- 13) Web lashings shall not be overloaded, only the maximum hand force of 500N (50daN onthe label; 1 daN = 1 kg) shall be applied. Mechanical aids such as levers, bars etc. as extensions are not to be used unless they are part of the tensioning device.
- 14) Web lashings shall never be used when knotted.
- 15) Damage to labels shall be prevented by keeping them away from sharp edges of the load, and if possible from the load.
- 16) The webbing shall be protected against friction, abrasion and damage from loads with sharp edges by using protective sleeves and/or corner protectors.

The Euro-Tex Label:

The information on the label of a load-restraint strap is laid out in accordance to the European Standard EN 12195-2:2001. The details on the label are useful in calculating your load restraint requirements and also for traceability of the strap. If the label is no longer present or is damaged in a way that makes it unreadable, then you are not allowed to use the strap at all.

Please find below details of what is on a load restraint strap and what it means:

Lashing Capacity of Strap.....	LC = 2500 daN	The short section of the label is sewn into the webbing of a strap and is there-fore hidden.
Webbing Material of Strap, PES = Polyester and PP = Polypropylene.....	Webbing Material = PES	
Name of Manufacturer of strap.....	EURO-TEX	
Serial Number or Traceability Code of strap.....	Serial Number: A14885	
Date of Manufacture.....	Date: May 2020	
European Standard that the strap conforms to.....	EN 12195-2:2000	
Name of Manufacturer of strap.....	EURO-TEX	The long section of the strap is the part of the label that is exposed and is the infor-mation that you are able to see on a load restraint strap.
Lashing Capacity of Strap along with Min break force when new.....	LC = 2500 daN Minimum Breaking Force (when new) = 5000kg	
Standard Hand Force / Standard Tension Force.....	S _{HF} 50daN / S _{TF} 350daN	
Date of Manufacture.....	Date: May 2020	
Webbing Material of Strap, PES = Polyester and PP = Polypropylene.....	Webbing Material = PES	
Length of Strap.....	L _{GL} = 9.7m	
Ratchet Straps should not be used for lifting, only for their intended purpose.....	“Not for lifting!”	
Name of Manufacturer of strap.....	EURO-TEX	
Serial Number or Traceability Code of strap.....	Serial Number: A14885	
The max elongation allowed is 7% according to the EN12915-2:2001 standard.....	Webbing Elongation at LC = <7%	
European Standard that the strap conforms to.....	Manufactured in accordance with EN 12195-2:2000

Webbing Width: 25mm

25mm Delta Ring

Minimum breaking
Force: 1000kg

Part No: 113018
Webbing Width: 25mm

25mm Anchor Plate

Minimum breaking
Force: 1000kg

Part No: 113114
Webbing Width: 25mm
Hole Diameter: 8mm

25mm Snap Hook

Minimum breaking
Force: 2000kg

Part No: 113138
Webbing Width: 25mm

25mm Flat Hook

Minimum breaking
Force: 750kg

Part No: 113308
Webbing Width: 25mm

50mm Webbing
Polyester (PES)

Minimum breaking
Force: 7500kg

- Part No: 113150—Blue
- Part No: 113151—Orange
- Part No: 113192—Yellow
- Part No: 113213—Black
- Part No: 113193—Red

50mm Webbing
Polyester (PES)

Minimum breaking
Force: 6000kg

- Part No: 113439—Blue
- Part No: 113011—Orange
- Part No: 113996—Yellow
- Part No: 113461—Black
- Part No: 113992—Red

48mm Webbing
Polyester (PES)

Minimum breaking
Force: 3000kg

- Part No: 114084—Blue
- Part No: 113991—Orange

48mm Webbing
Polyester (PES)

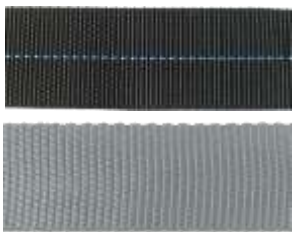

Minimum breaking
Force: 2300kg

- Part No: 113462—Black

45mm Webbing
Polyester (PES)

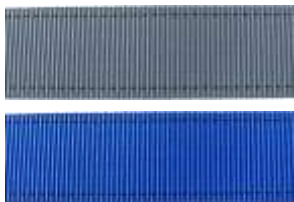

Minimum breaking
Force: 3000kg

- Part No: 113454—Black
- Part No: 113055—Blue
- Part No: 113199—Grey
- Part No: 114063—Black with blue ID line
- Part No: 113883—Black with yellow ID lines

43/45mm Webbing
Polyester (PES)

Minimum breaking
Force: 2300kg

- Part No: 113449—Black
- Part No: 113450—Grey
- Part No: 113448—Blue
- Part No: 113453—Orange
- Part No: 114019—Red

45mm & 48mm Webbing
Polypropylene (PP)

Minimum breaking
Force: 1400kg

- Part No: 113350—Black 45mm
- Part No: 113352—Black 48mm

47mm Webbing
Seat Belt Webbing

Minimum breaking
Force: 2700kg

- Part No: 114013—Black
- Part No: 113459—Grey

Heavy Duty Wear Sleeve

For webbing widths
up to 50mm

- 250mm Length = **Part No: 113110—Yellow**
- 500mm Length = **Part No: 113214—Yellow**
- 750mm Length = **Part No: 113188—Yellow**

Other lengths available on request

PVC Wear Sleeve

For webbing widths
up to 50mm

- 250mm Length = **Part No: 116197 —Blue**
- 500mm Length = **Part No: 116198—Blue**
- 750mm Length = **Part No: 116199—Blue**

Other lengths available on request

Wear Sleeve

For webbing widths
up to 50mm

- 250mm Length = **Part No: 116221—Grey**
- 500mm Length = **Part No: 116222—Grey**
- 750mm Length = **Part No: 116223—Grey**

Other lengths available on request

Plastic Corner Protector

Part No: 113220

Webbing Widths: 35mm—75mm

Colour: Black

Plastic Corner Protector
Heavy Duty

Part No: 113221

Webbing Widths: 35mm—75mm

Colour: Black

Plastic Corner Protector
Long, Heavy Duty

Thickness: 5mm

Colour: Black

800mm Length: **Part No. 113222**

1100mm Length: **Part No. 113223**

Round Staple

Hole Centers = 51mm
Inside Distance = 20mm

Inner Height = 21mm = **Part No. 113950**
Inner Height = 25mm = **Part No. 113951**
Inner Height = 30mm = **Part No. 113952**
Inner Height = 38mm = **Part No. 113953**
Inner Height = 45mm = **Part No. 113954**

4 Hole Staple

Hole Centers = 51/26mm
Inside Distance = 20mm

Inner Height = 25mm = **Part No. 113955**
Inner Height = 30mm = **Part No. 113956**
Inner Height = 38mm = **Part No. 113957**
Inner Height = 45mm = **Part No. 113958**
Inner Height = 55mm = **Part No. 113959**

Turnstaple

Hole Centers = 51mm
Inside Distance = 17mm

Inner Height = 19mm = **Part No. 113964**

Rectangle Staple
51mm Hole Centers

Hole Centers = 51mm
Inside Distance = 26mm

Inner Height = 16mm = **Part No. 113967**
Inner Height = 20mm = **Part No. 113968**
Inner Height = 25mm = **Part No. 113969**
Inner Height = 30mm = **Part No. 113970**
Inner Height = 35mm = **Part No. 113971**

Snoopy Staple

Hole Centers = 55mm
Inside Distance = 10/28mm

Inner Height = 30mm = **Part No. 114090**

Rocking Staple

Hole Centers = 30mm
Inside Distance = 21mm

Inner Height = 25mm = **Part No. 113963**
Inner Height = 37mm = **Part No. 113960**
Inner Height = 45mm = **Part No. 113961**
Inner Height = 55mm = **Part No. 113962**

Rectangle Staple
34mm Hole Centers

Hole Centers = 34mm
Inside Distance = 16mm

Inner Height = 11mm = **Part No. 113210**
Inner Height = 15mm = **Part No. 113890**
Inner Height = 17mm = **Part No. 113211**

Rectangle Plate

Hole Centers = 34mm = **Part No. 113889**
Hole Centers = 51mm = **Part No. 113899**

PVC TIR Strap Roll

Strap Width = 20mm

Part No: 113203

PVC Straps with Collar

Strap Width = 20mm
Hole distances = 20mm

Length = 250mm = Part No. 114091
Length = 350mm = Part No. 114092
Length = 500mm = Part No. 114093

PVC Strap with D Ring

Strap Width = 20mm
Hole distances = 25mm

Length = 300mm = Part No. 113212
Length = 400mm = Part No. 113893
Length = 500mm = Part No. 113894

PVC Strap with Pad

Strap Width = 20mm
Length= 105mm

Part No: 113892

Strap for Rectangle Eyelet

Length = 124mm

Part No: 113895

Strap for Oval Eyelet

Length = 180mm

Part No: 113896

S Hook
